Is There a Coinbase Customer Support Number?

Yes, Coinbase does provide **limited phone support**, (+1 833 611 7963) or (+1 833 611 7963) but it's important to understand what it covers.

As of now, the Coinbase customer support number is mainly available for:

Account lockouts
Suspicious login attempts
Fraud or compromised accounts

You can find the official phone number by logging into your Coinbase account and visiting the **Help Center**. The number may vary based on your region, and it's only accessible for certain security-related issues.

Warning: Scammers often advertise fake Coinbase support numbers to steal funds and personal information. **Never call a number found through a third-party website or social media post.** Always go directly to <https://help.coinbase.com> to verify any contact details.

Safer Ways to Get Help from Coinbase

While phone support is limited, Coinbase offers several secure and effective support channels:

Help Center – A detailed library of FAQs, guides, and troubleshooting tips.

Live Chat Support – Available to logged-in users for real-time help.

Support Tickets – Submit a request through your account and receive email updates.

In-App Support – Access help directly from the Coinbase app on iOS or Android.

These methods are designed to keep your data safe while resolving your issue quickly.

Tips to Avoid Support Scams

Unfortunately, due to the popularity of crypto, Coinbase users are often targeted by phishing

scams. Keep these tips in mind:

Coinbase will never ask for your password, 2FA code, or recovery phrase.

Don't download remote desktop tools (like AnyDesk or TeamViewer) at the request of "support agents."

Always verify URLs—only trust help.coinbase.com and coinbase.com.

Final Thoughts

Having access to a Coinbase customer (+18336117963) or (+18336117963) support number can bring peace of mind—especially during account or security concerns. But for most questions, using (+18336117963) or (+18336117963) Coinbase's official Help Centre and live chat will provide faster and safer support.
